Unbeknownst to most of the city's inhabitants, a rural community

of garbage workers once existed on a now-vanished island in New York City. Barren Island was a swampy speck in Jamaica Bay where a motley group of new immigrants and African Americans quietly processed mountains of garbage and dead animals starting in the 1850s. They turned the waste into useful industrial products until their eviction by Robert Moses, in the name of progress, in 1936. Barren Islanders built businesses, fought fires, demanded a public school and worshipped at churches as they created a quintessentially American community from scratch. Author Miriam Sicherman tells the story of a Brooklyn neighborhood lost in the annals of New York City history.

Refuse Collection and Disposal, a Bibliography, 1941-1950, by Ralph J. Van Derwerker and Leo Weaver, Division of Sanitation Arcadia Publishing

An unprecedented look at that most commonplace act of everyday life--throwing things out--and how it has transformed American society. Susan Strasser's pathbreaking histories of housework and the rise of the mass market have become classics

in the literature of consumer culture. Here she turns to an essential but neglected part of that culture--the trash it produces--and finds in it an unexpected wealth of meaning. Before the twentieth century, streets and bodies stank, but trash was nearly nonexistent. With goods and money scarce, almost everything was reused. Strasser paints a vivid picture of an America where scavenger pigs roamed the streets, swill children collected kitchen garbage, and itinerant peddlers traded manufactured goods for rags and bones. Over the last hundred years, however, Americans have become hooked on convenience, disposability, fashion, and constant technological change--the rise of mass consumption has led to waste on a previously unimaginable scale. Lively and colorful, Waste and Want recaptures a hidden part of our social history, vividly illustrating that what counts as trash depends on who's counting, and that what we throw away defines us as much as what we keep.
